## Python Conversational Loop Assignment

**Student Task:** Build Your Own Rule-Based Python Chatbot

### Python Code

```
name = input("Enter your name: ")

print("Hello", name + "! Type 'bye' or 'exit' to quit.")

while True:
    msg = input("You: ").lower().strip()

    if "hello" in msg or "hi" in msg:
        print("Bot: Hi", name + "! How can I help you?")

    elif "how are you" in msg:
        print("Bot: I am doing great!")

    elif "course" in msg:
        print("Bot: Learn Python, SQL and Django for placements.")

    elif "time" in msg:
        print("Bot: I cannot access live time, but keep practicing!")

    elif msg == "bye" or msg == "exit":
        print("Bot: Goodbye", name + "!")
        break

    else:
        print("Bot: Sorry, I didn't understand that.")
```

### Sample Test Output

Enter your name: Mukesh

Bot: Hello Mukesh! Type 'bye' or 'exit' to quit.

You: hello
Bot: Hi Mukesh! How can I help you?

You: how are you
Bot: I am doing great!

You: course
Bot: Learn Python, SQL and Django for placements.

You: bye
Bot: Goodbye Mukesh!

## Requirements Covered

- Ask user's name
- while True loop
- input() used
- lower().strip()
- Recognizes hello and hi
- 3 question topics
- if / elif / else
- break on bye/exit
- Uses user's name
- Unknown message handled
